

CALIFORNIA REGIONAL WATER QUALITY CONTROL BOARD
SAN FRANCISCO BAY REGION

ORDER NO. 90-085

AMENDING WATER RECLAMATION REQUIREMENTS FOR:

LEW GALBRATH GOLF COURSE,
PORT OF OAKLAND,
CITY OF OAKLAND, AND
CITY OF SAN LEANDRO
ALAMEDA COUNTY

The California Regional Water Quality Control Board, San Francisco Bay Region, (hereinafter called the Board) finds that:

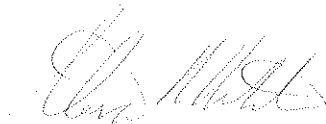

1. On January 20, 1988, the Board adopted water reclamation requirements for Lew Galbraith Golf Course in Order No. 88-008. The Order named the golf course, the Port of Oakland (landowner), City of Oakland, and City of San Leandro (producer of reclaimed water).
2. The Lew Galbraith Golf Course is located in the City of Oakland, at 10085 Doolittle Drive, adjacent to the City of San Leandro Water Pollution Control Plant. The City of San Leandro is currently providing treated wastewater through spray irrigation of the Galbraith Golf Course during dry weather months (approximately 53 million gallons per year). The City of San Leandro and East Bay Municipal Utility District (EBMUD) plan to expand reclaimed water services from the San Leandro plant to the Alameda Golf Complex and median strips along Airport Drive and Harbor Bay Parkway.
3. EBMUD, as sole purveyor of reclaimed water, serves as the lead agency and assumes responsibility for design and construction of reclamation projects.
4. EBMUD filed a Report on January 18, 1990 to request the Order No. 88-008 be amended to include Alameda Golf Complex and median strips along Airport Drive and Harbor Bay Parkway.
5. The Alameda Golf Complex is located entirely within the City of Alameda and is operated by the City's Parks and Recreation Department. The complex includes one 9-hole and two 18-hole public golf courses. Under the proposed expansion plans, up to 160 million gallons per year of reclaimed water will be provided by San Leandro Reclamation Facility to the Alameda Golf Complex.
6. The Airport Drive median consists of a five acres of median strip located in the center of Airport Drive between Oakland Airport and Doolittle Drive in Oakland.

7. The Harbor Bay Parkway project consists of an approximately 12 acres of irrigated turf and shrubbery along Harbor Bay Parkway between Doolittle Drive and Harbor Bay Business Park.
8. The Board adopted a revised Water Quality Control Plan for the San Francisco Bay Basin (Basin Plan) on December 17, 1986. The water quality goals to be used in regulating water quality factors as set forth in the Basin Plan include maximum feasible reclamation or reuse of municipal, industrial, and agricultural wastewaters.
9. The Basin Plan identifies the beneficial uses of the main groundwater basins in the Region as:
 - a. Municipal supply
 - b. Industrial process water supply
 - c. Industrial service supply
 - d. Agricultural supply
10. Section 13523 of the California Water Code provides that a Regional, after consultation with and reception of recommendations from the State Department of Health Services, and if it determines such action to be necessary to protect the public health, safety, or welfare, shall prescribe water reclamation requirements for water which is used or proposed to be used as reclaimed water.
11. The amendment of water reclamation requirements is exempt from the provisions of Chapter 3 (commencing with Section 21000 of Division 13) of the Public Resources Code (CEQA) pursuant to 14 CCR 15304.
12. This amendment to water reclamation requirements is in conformance with the statewide reclamation criteria established by the State Department of Health Services as prescribed in 22 CCR 60301 et. seq.
13. The discharger and interested agencies and persons have been notified of the Board's intent to amend requirements for the existing discharge and have been provided with the opportunity for a public hearing and the opportunity to submit their written views and recommendations.
14. The Board, at a public meeting, heard and consider all comments pertaining to the discharge.

IT IS HEREBY ORDERED that the Discharger, in order to met the provisions contained in Division 7 of the California Water Code and regulations adopted thereunder shall comply with the following:

- A. The City of Alameda is added to the list of named dischargers in Order No.88-008.
- B. Finding 3 is amended to include the City of Alameda as a User of reclaimed water and to add the following areas where reclaimed water may be applied: Alameda Golf Complex, Airport Drive median, and Harbor Bay Parkway landscaping.
- C. As a user of reclaimed water, the City of Alamada shall comply with all requirements of Order No. 88-008, including the self-monitoring program.

I, Steven R. Ritchie, Executive Officer do hereby certify the foregoing is a full, true and correct copy of an Order adopted by the California Regional Water Quality Control Board, San Francisco Bay Region on June 20, 1990.

STEVEN R. RITCHIE
Executive Officer
